SUMMARY

Computer Science student at IIIT Sri City with hands-on experience in backend development, clean API design, and AI-integrated systems. Demonstrated impact through a Syrotech Hackathon 2025 win — an AI-powered education platform built to compete against 150+ teams. Focused on writing purposeful, scalable code that solves real problems. Currently developing scalable, production-quality applications at IIIT Sri City, driven by a focus on clean architecture, efficient APIs, and real-world engineering impact.

EDUCATION

Indian Institute of Information Technology, Sri City <i>Bachelor of Technology – B.Tech, Computer Science (CGPA: 9.3/10)</i>	Andhra Pradesh, India Aug 2024 – Jul 2028
--	--

TECHNICAL SKILLS

- **Languages:** C++, TypeScript, JavaScript, Python, Java, SQL
- **Backend:** Node.js, NestJS, REST APIs, PostgreSQL, MySQL, Supabase
- **ML/AI:** PyTorch, MNE, EEGNet, OpenAI API, NLP, LangChain
- **Tools & Platforms:** Git, Docker, Streamlit, Postman, Jira
- **Core CS:** Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks

EXPERIENCE & COMMUNITY INVOLVEMENT

Teaching Assistant <i>IIIT Sri City</i>	Jan 2026 – May 2026
– Supported Data Structures & Algorithms lab by mentoring students on complexity analysis, graph traversal, and dynamic programming. – Assisted Signals & Systems lab, helping students bridge theoretical concepts with structured, optimized implementations.	
Web & Tech Core Member <i>TEDx Sri City</i>	Oct 2025- April 2026
– Contributed to the web and technology vertical, supporting event infrastructure and digital presence.	
NLP Domain Member <i>Epoch – AI/ML Club, IIIT Sri City</i>	Aug 2025- April 2026
– Collaborated on NLP projects and contributed to technical events and knowledge-sharing sessions.	

PROJECTS

Restaurant Reservation & Capacity Management Platform <i>NestJS, TypeScript, JavaScript, HTML, CSS</i>
– Developing a full-stack platform with live table availability tracking and automated reservation lifecycle management. – Designed role-based dashboards for customers, staff, and administrators with distinct, purpose-built workflows.
EEG-Based Cognitive Stress and Motor Imagery Classification (BCI) <i>Python, MNE, EEGNet, ShallowConvNet, PyTorch</i>
– Building a Brain-Computer Interface to detect cognitive stress from EEG signals (SAM40) and classify four motor imagery classes (BCI Competition IV Dataset 2a) with subject-independent evaluation. – Developed an end-to-end pipeline covering preprocessing, artifact removal, feature extraction, and cross-subject model generalization using EEGNet and ShallowConvNet.
IntelliGrader – AI-Powered Smart Education System <i>OpenAI API, NLP, Streamlit, PostgreSQL, YouTube API</i>
– Built an LLM-powered platform for automated PDF summarization, chatbot-based doubt resolution, AI-driven answer evaluation, and personalized YouTube learning recommendations. Won Syrotech Hackathon 2025. – Designed a scalable PostgreSQL (Supabase) backend with an intuitive Streamlit interface, developed collaboratively in a team.
