

BHUMIREDDY THARUN REDDY

tharunreddy.b24@iiits.in | LinkedIn | GitHub

SUMMARY

Computer Science student with strong foundations in backend development, scalable system design, and AI/ML. Experienced in building full-stack and real-time systems with a focus on performance and usability. Passionate about solving real-world problems through engineering and intelligent systems.

EDUCATION

Indian Institute of Information Technology, Sri City

Bachelor of Technology – B.Tech, Computer Science (CGPA: 9.3/10)

Andhra Pradesh, India

Aug 2024 – Jul 2028

EXPERIENCE

Teaching Assistant

Jan 2026 – Present

- Mentored students in Data Structures & Algorithms and Signals & Systems labs, reinforcing core concepts such as time/space complexity, recursion, graph traversal, and dynamic programming.
- Guided students in designing efficient algorithms and translating problem statements into optimized implementations using structured approaches.
- Strengthened students' problem-solving skills by breaking down complex problems into modular components and emphasizing clean coding practices.

PROJECTS

Restaurant Reservation & Capacity Management Platform | *NestJS, TypeScript, JavaScript, HTML, CSS*

- Developing a full-stack platform to manage restaurant reservations and real-time seating operations.
- Live table availability tracking and automated reservation lifecycle management.
- Designed role-based dashboards for customers, staff, and administrators with distinct workflows.

Cognitive Stress Detection using EEG & Deep Learning | *Python, MNE, EEGNet, ShallowConvNet, PyTorch*

- Building a Brain-Computer Interface system to detect cognitive stress from EEG signals using the SAM40 dataset.
- Developing an end-to-end pipeline including preprocessing, artifact removal, and feature extraction.
- Training EEGNet and ShallowConvNet models with emphasis on cross-subject generalization.

IntelliGrader – AI-Powered Smart Education System | *OpenAI API, NLP, Streamlit, PostgreSQL, YouTube API*

- Built an LLM-powered platform for automated PDF summarization, real-time chatbot-based doubt resolution, and AI-driven answer evaluation.
- Integrated YouTube API to deliver personalized learning recommendations based on user needs.
- **Won Syrotech Hackathon 2025.**
- Designed a scalable backend using PostgreSQL (Supabase) with an intuitive Streamlit interface; developed collaboratively in a team.

COMMUNITY INVOLVEMENT

Web & Tech Core Member

Oct 2025- April 2026

TEDx Sri City

- Contributed to the web and technology vertical, supporting event infrastructure and digital presence.

NLP Domain Member

Aug 2025- April 2026

Epoch – AI/ML Club, IIIT Sri City

- Collaborated on NLP projects and contributed to technical events and knowledge-sharing sessions.

TECHNICAL SKILLS

- **Languages:** C++, TypeScript, JavaScript, Python, Java, SQL
- **Backend:** Node.js, NestJS, REST APIs, PostgreSQL
- **ML/AI:** PyTorch, MNE, EEGNet, OpenAI API, NLP, LangChain
- **Tools & Platforms:** Git, Docker, Streamlit, Supabase
